## Kayak Prices

To review kayak designs more in depth, go to the web site.  
Features on all standard custom wood strip kayaks include:

- 1/4" cedar strip staple-less construction
- 6 oz. and 4 oz. fiberglass inside and outside set in marine epoxy
- Custom cockpit sizing
- Adjustable foot pedals
- Custom carved high density foam seat/backrest
- Two flush hatches with internal hold downs
- Standard deck rigging (bungle/plastic fittings)
- Minimum 4 coats marine UV varnish
- Two wood strip bulkheads

Model	Description	Features	Pricing
Luna	Don't be fooled by the small size of this boat; it still has the capacity to carry a load. The longer waterline ratio to overall length puts lots of boat in the water, which means this boat has equal tracking ability to any kayak in its class. The square stern allows for the attachment of a rudder if that is your choice.	Standard	Starting at \$4500
Springer	Springer is a playful, low volume kayak with a slightly lower deck profile. At 16'6" and a maximum beam of 22.4", she is perfect for day use and smaller paddlers. Springer is sure to bring pleasure to those who like to explore shorelines and tidal areas.	Standard	Starting at \$4600
Skana	Skana was the first in our growing line of wood kayaks. At 17'4" and a maximum beam of 24", this kayak will handle you and all your gear for day trips and overnight excursions. Still one of our most popular designs.	Standard	Starting at \$4700

Skana HV	Skana High Volume is for those that require or prefer a little more leg room. We raised the sheer line giving an inch or so more free board and then raised the deck profile to match. The length and width are the same and the hull is basically the same configuration as our standard Skana with primarily the same underwater particulars	Standard	Starting at \$4700
Kiska	We originally set out to modify our Skana model and call it Skana Sport, but when all was done, this new design deserved its own name. Modeled after more traditional Greenland style of kayaks, Kiska has increased rocker, a very fine entry and a flat, low rear deck for lay back rolls.	Standard	Starting at \$4900
Hyak	For experienced paddlers who are looking for a "high performance" kayak with plenty of speed and handling ability, <b>Hyak</b> is your choice. With moderate rocker, finer entries and exits, turning is best performed while leaned.	Standard	Starting at \$4800
Bjossa	For larger paddlers who have difficulty finding a kayak to fit, " <b>Bjossa</b> " was designed with you in mind. At 18'10", and a maximum beam of 23", this high volume kayak is the one for long, multi-day excursions. With a boat this long, we have made sure there is enough rocker which means even at this length, turning is not a problem. With a higher deck and a larger standard cockpit for easier entry, there is also plenty of leg and knee room. The higher bow assists in rising over waves.	Standard	Starting at \$4800

Kyosha Double	At 21 ft. long and 27 inches wide, the double will carry all your gear and is stable enough for any paddlers. Standard comes with extra day hatch and full rudder assembly with toe control foot pedals. The front cockpit has standard foot pedals.	Standard	Starting at \$5700
		Decorative deck patterns	Add \$400 +
		Decorative hull patterns	Add \$400 +
		Recessed wood fittings (10)	Add \$150
		Full rudder kit	Add \$500
		Solid wood knee braces	Add \$150
		Solid inlays	Add \$250 +
		Extra day hatch/bulkhead	Add \$200
		Spray clear coating	Add \$400
